Strategic Positioning for Successful Farmers

Michael Boehlje and Brent Gloy

Center for Commercial Agriculture
Purdue University &
Ag Economic Insights, LLC

What Is Strategy?

- How a business creates value for its customers
- The key questions
 - Who? customer focus
 - What? products/services
 - How? processes/procedures to deliver
- Doing the right thing (doing things right is operations)

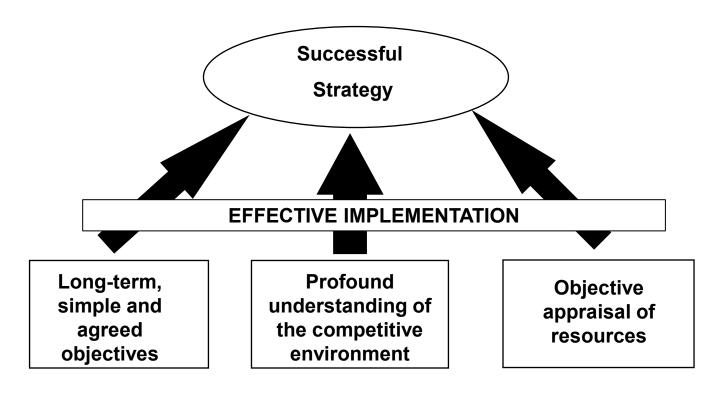

What is strategy?

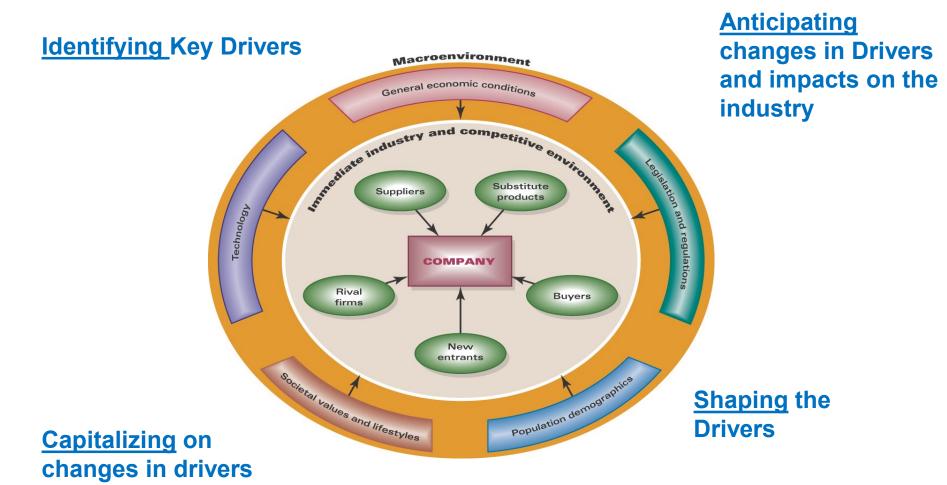

- Strategy is....
 - Looking longer term
 - Capitalizing on change
 - A stream of decisions
 - Focused on a purpose
 - Managing strategic risks
 - Creating a unique and valuable position
 - Choosing what not to do

Common Elements in Successful Strategy

Looking Outside the Business

Making Better Decisions

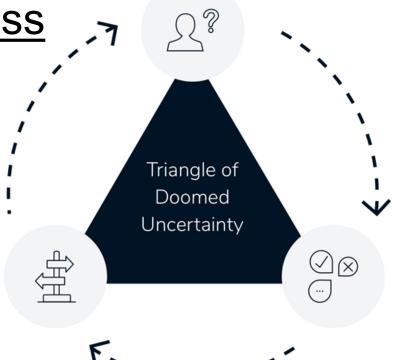

Open-Ended Questions

A broken process

Resolution:

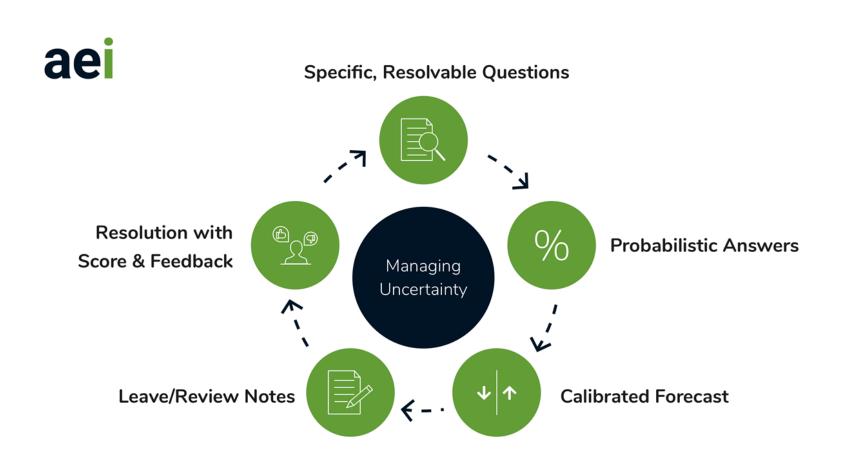

1) Never revisit, or

2) Hindsight 20/20

Vague Answers

A Better Process

Key Tool: Utilize Decision Journals

- It can be specific, or broad
 - "Should I sell corn this week?
 - "How can I improve my grain marketing for 2020?"
- Capture as much as possible
 - Use pre-set questions to expand your thinking
- Review!

Key Questions for Reflection

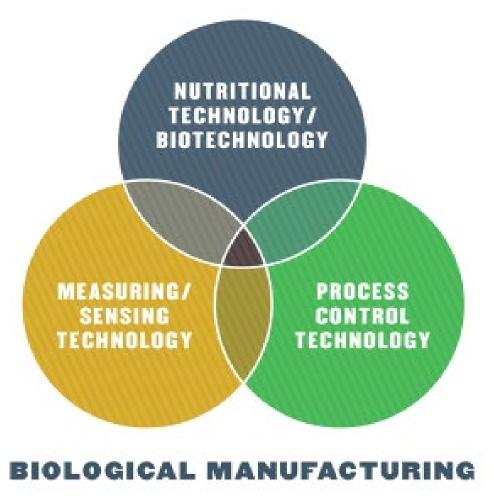

- What do you expect to happen?
- Why do you expect this to happen?
- What alternative decisions/actions did you consider?
- What is your estimate of the probability that the decision will be successful?

An Exercise

What is the probability that the U.S. inflation rate - <u>measured by</u> the Personal Consumption Expenditure Index — is higher than 6% for 2023?

- What do you expect to happen?
- What assumptions are behind this expectation?
- What decisions/actions are you considering as a result of your expectation?
- What is your estimate of the probability that the decision will be successful?

Modern Farming: From "Growing Stuff" to Precision Production

Data and Information are Key

- To be <u>VALUABLE</u>, data must help make better informed decisions
- What characteristics of data are required to do this?

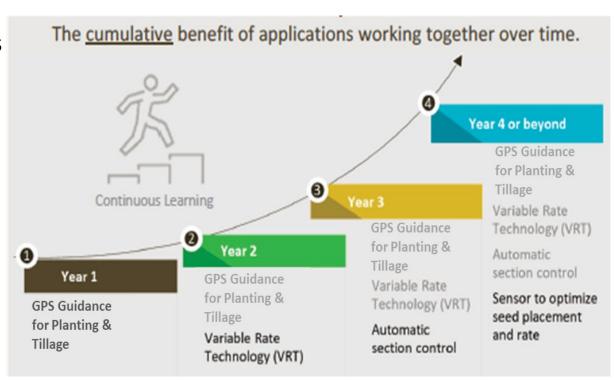

Critical Characteristics of Data

- 1. Timely
- 2. Accurate
 - *Granularity
 - *Distributions vs. point estimates
- 3. Objective
- 4. Understandable
- 5. Convenient
- 6. Context Specific
- 7. Decision Focused

The Payoff of Precision Farming

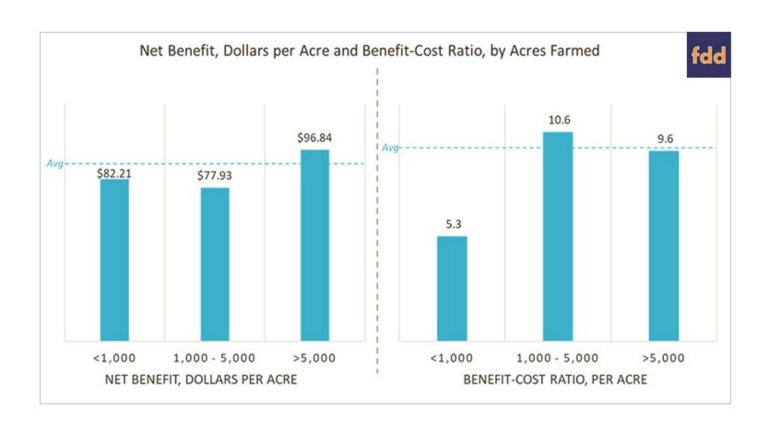

- Cost Reduction and Efficiency Improvements
- Value Enhanced Differentiated Products
- 3. Span of Control
- Reduced Downtime and Better Capacity Utilization
- 5. Risk Reduction
- Landlord/Supplier and Buyer Relationships
- Enhanced Value of Property

<u>The Pay-off – Numerical Evidence</u>

- In-depth interviews of early adopters of precision agriculture technology
- 25 tools and practices included
 - Legacy Control Systems (e.g., yield monitors and auto steer)
 - Mapping
 - Agronomic/Fertility Systems (e.g., grid/zone soil mapping, variable rate technology, sensors)
 - Monitoring Systems (e.g., drones or aerial imagery)
 - Decision Support Technologies (e.g., analytics, management systems)

Whole Farm Benefits of Full Package Adoption of Precision Farming Practices

Critical Additional Benefits

For the Value Chain

- 1) Food Safety
- 2) Sustainability
- 3) Traceability

For the Environment

- 1) Reduced Fertilizer and Chemical Leaching/Runoff
- 2) Comprehensive Nutrient Management
- 3) Conserving Irrigation Water

Strategic Positioning Options: Critical Choices

- Example of Possible Positions in an Agricultural Production Firm
 - Low-cost, bulk commodity producer
 - Customer-oriented specialty products producer
 - Full-service, consumer-focused custom farming operation
 - Efficient, partnership-focused contract animal feeder
 - Technology-focused, cutting-edge animal breeder

Commodity Strategy

- **Production Emphasis** the focus is primarily on production activities rather than marketing or finance
- Manufacturing Mentality the science and systematic process of producing food products rather than the art of raising commodities is emphasized
- Low Cost Producer cost control is critical to being competitive in a commodity business
- Large Scale Operation larger scale operations generally have cost advantages over smaller scale units
- Outsource Resources land is rented; machinery is leased or custom hired
- **Open/Impersonal Markets** markets are open to all who meet gross commodity product standards at publicly known prices
- Downside Price Risk excess worldwide production can result in significant downward price movements
- **Independent Decision-Making** the traditional independent farmer provides most of the managerial and other resources and makes most of

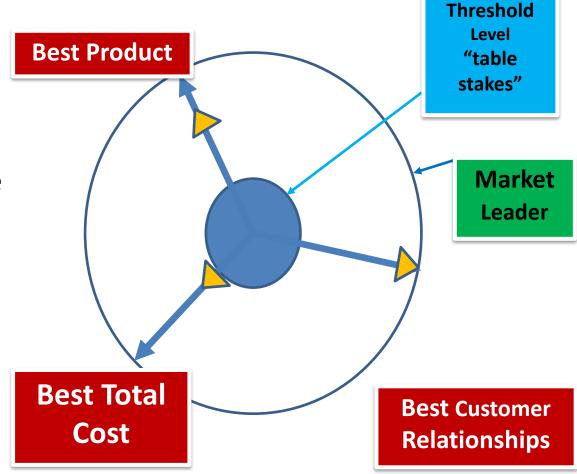

Differentiation Strategy

- End-user Focus the focus is on a final consumer or food processors needs rather than commodities
- Distribution/Marketing Mentality marketing and distribution decisions and expectations of consumers are as (or more) important than production considerations
- Value-Added Production the additional revenue to be gained by further processing and distribution is emphasized
- Smaller Scale Operation a focus on a segmented consumer market and niche markets allows and encourages small scale, more nimble and flexible producers
- Insource (own) Resources more land and other resources are owned because the scale of operation is not beyond the financial resource base of the smaller producer
- Negotiated Markets responding to consumer needs and producing products with specific attributes requires more direct communication throughout the chain
- Relationship Risk contracts can be terminated and alliances severed unexpectedly
- Interdependent Decision-Making the negotiated linkages with suppliers and processors reduces independence and forces joint, interdependent decision-making

Dimensions of Positioning

- Product Innovation
- Customer Intimacy
- Operational Excellence
- Supply Chain Linkages

Integrated Risk Management: A New Paradigm for Production Agriculture

Types of Risk/Uncertainty (Traditional Focus)

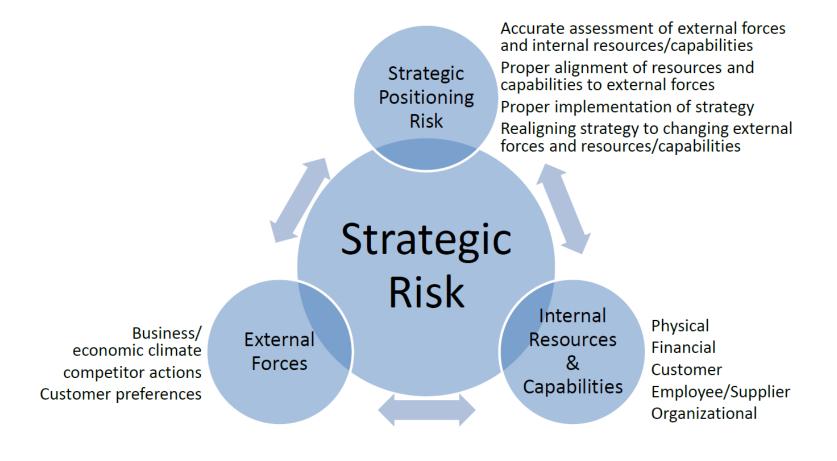

Sources of Business Risk

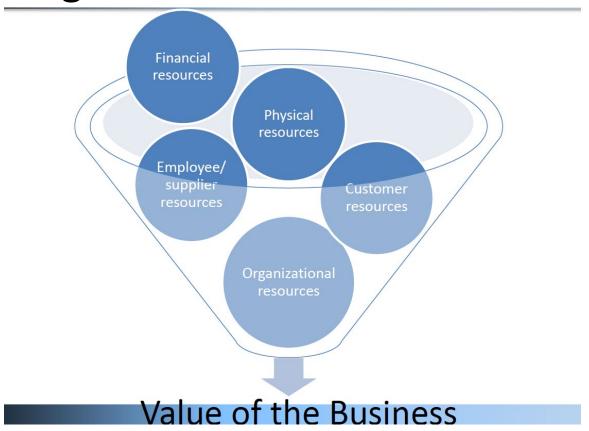

Sources of Financial Risk

Sources of Strategic Risk

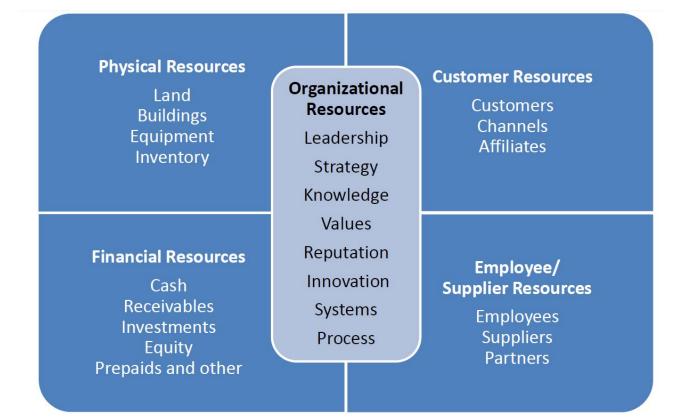

Creating Value

Resources of a Business

Physical Resources

Unauthorized use Inefficient use Catastrophic loss Unacceptable costs

Customer Resources

Pervasive quality failures
Significant losses of key customers or channels
Inefficient channels
Loss of market or market opportunities
Ineffective alliances

Organizational Resources

Financial Resources

Poor economic performance
Lack of economic sources of debt
or equity capital
Unacceptable losses
Insufficient liquidity
Inefficient use

Employee/Supplier Resources

Talent shortages
Work stoppages
Loss of morale
Poor supplier performance
Excessive costs lead times
Poor quality
Ineffective partnerships

Physical Resources

Unauthorized use Inefficient use Catastrophic loss Unacceptable costs

Customer Resources

Pervasive quality failures
Significant losses of key customers or channels

A Risk Management Assessment Tool

		Check the appropriate box				1944
		1	2	В	4	5
Production						
1	Uses best production/operations management practices and current technology in crop and livestock production.					
2	Has appropriate technology and machinery/equipment/facility capacity for efficient operations.					
3	Identifies, monitors, and benchmarks key production efficiency measures.					
4	Maintains positive image and relationships with neighbors and community					
Margin						
1	Use appropriate marketing strategies (contracts, futures, options) to reduce risk.					
2	Develops appropriate procurement/input purchasing procedures to reduce cost/risk.					
3	Documents procurement and product pricing performance.					
Human Resources						
1	Has a seasoned, skilled, and reliable workforce.					
2	Committed to employee training/development, through internal and/or external training and development.					
3	Uses outside consultants (crop scouts, marketing advisor services, legal, accounting services, and veterinarians, etc.) when appropriate.

		1	2	В	4	5
Supply Chain						
1	Has longer-term and sustained relationships with suppliers and buyers.					
2	Manages concentration and counterparty risk with contract partners					
	(landlords, integrator partners, suppliers, and customers)					
3	Has appropriate insurance (casualty/crop, liability, accident, etc.) in place with lender as beneficiary.					
Reg	gulatory					
1	Is in documented compliance with regulatory requirements (licenses, environmental permits, etc.)					
2	Has identified environmental risks and developed contingency procedures for potential infringement.					
Finance/Accounting/Planning						
1	Has developed a business plan which identifies the long range vision and plans for the business.					
2	Has an effective financial accounting system which provides timely information for management and lenders.					
3	Has reasonable internal controls in place for the organization's size.					
4	Prepares a budget for the company on an annual basis and monitors it with the management team.					
5	Has a long term capital replacement and improvement plan and understands the basic costs of capital concepts.					
6	Has effectively managed interest rate risk through locking in longer term rates on a majority of term debt.					
7	Has procedures and personnel that insure compliance with federal and state income and payroll tax regulations.					

Managing Your Farm Business in Turbulent Times: Ten Key Takeaways From TEPAP

TEPAP -- 10 Key Takeaways

- 1. Create value for your customer
- 2. Focus on a strategy
- Increase asset utilization (asset turnover)
- 4. Increase margins
- 5. Grow volume/sales
- 6. Manage money/capital
- 7. Use time efficiently
- 8. Manage operating risk
- 9. Get smart
- 10. Think like a CEO

1. Create Value for Your Customer

- Understand your customer and his/her benefits
- Differentiate on service (quality, storage, JIT delivery)
- Value-enhanced products(?)

2. Focus on a Strategy

- Operational excellence
- Customer intimacy
- Product/process innovation

3. Increase Asset Utilization (asset turnover)

- Lease rather than buy
- Joint venture/share machinery
- Outsource/custom farm
- 24 hour/day operations (use autosteer)

4. Increase Margins

- Cost control
- Buy right
- Best management practices/technology
- Timeliness
- Market rather than price

5. Grow Volume/Sales

- Increase productivity
- More volume with less investment
- Joint venture for size/volume to get market access

6. Manage Money/Capital

- Leasing vs buying
- Use debt (cheaper than equity)

7. Use Time Efficiently

- Focus on management
- Hire skilled employees
- Use scheduling/work-flow planners
- Develop SOPs (standard operating procedures)

8. Manage Operating Risk

- Higher cash costs and land rents
- Increased margin compression and margin risk
- Price products and inputs at same time
- Contract and forward price
- Less operating risk → more debt → higher ROE

9. Get Smart

- Use consultants
- Network with successful farm and non-farm business managers
- Develop management skills

10. Think like a CEO

- People
- Money
- Relationships
- Strategy
