### **Sample Policy - Capital Investment (or Retained Earnings) and Capital Withdrawals – (Partnerships and Sub S Corporations)**

The amount of capital provided by each capital provider is a key component in determining how net revenue of the business will be shared among owners or risk takers. The partners, joint members, or stockholders providing capital shall establish at least annually a common agreement on the base level of capital each capital provider is expected to keep invested in the joint operation. This base level will be established giving consideration to:

Minimum financial constraints or objectives (i.e. targets for working capital level, debt to equity ratio, and borrowing reserves)

Needs of the business to fund future growth

Ratio of ownership each capital provider wishes to maintain for future revenue sharing.

An analysis of capital account balances will be done following final draws for tax purposes on April 15 annually. Capital providers can withdraw excess capital for personal living and tax payments, outside investments, or other needs. Excess funds can also be loaned to the joint operation at a market rate of interest.

If a capital provider cannot maintain a target capital share level after an extended shortage situation, the partners will re-evaluate the at-risk capital resources provided and adjust the revenue sharing arrangement to reflect the change in capital contribution level.
